

Project Logistics

Industrial Projects

Through predictive analytics, automation and smart localisation processes, we ensure that your supply chain becomes more competitive and sustainable.

Industrial Projects

Are you looking for a project forwarder specialised at oversized and heavy-lift transportation to remote locations with time-critical deadlines?

Tailor-made supply chain solutions

To ensure safe and proper transportation of non-standard goods or heavy loads, many factors need to be considered. These include environmental characteristics, dimensions and properties of the cargo, susceptibility to damage, weather conditions, suitable transport, effective and safe route, limited budget, and demanding schedules. All these factors should be taken into account at the initial stage of the project.

Kuehne+Nagel Project Logistics offers you customisable, sophisticated solutions for the transport of your goods. This includes better equipment design to increase safety, reduce costs and improve your delivery as well as assembly deadlines.

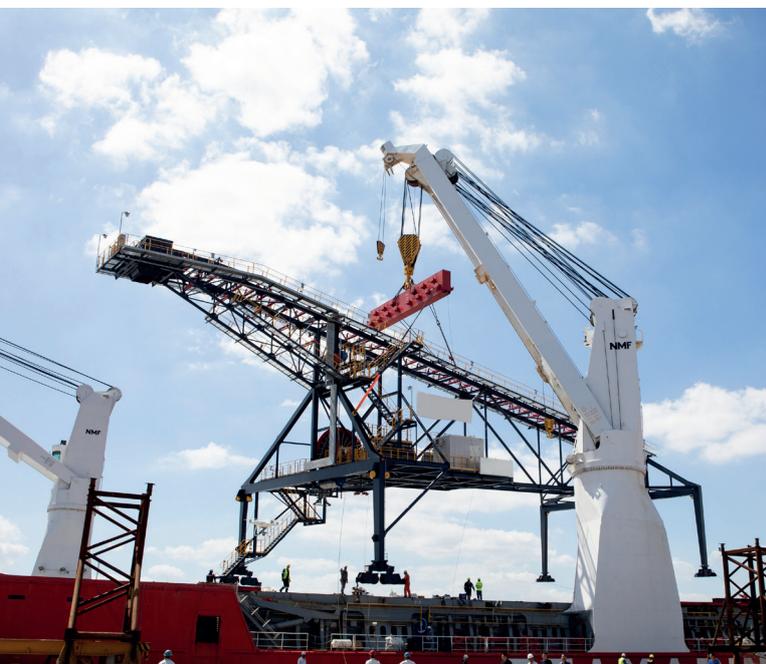

Any kind of heavy lift transport requires a range of in-depth maritime and transport engineering knowledge. Our global engineering network delivers intelligent strategies for complex tasks way ahead of project execution from the planning phase to the handover. This includes carrying out necessary feasibility studies, individual lifting and lashing calculations as well as evaluating cargo stowage plans to avoid unforeseen risks or delays in the schedule.

Not all cargo requires the same mode of transport. Our in-house chartering team will assist you in sourcing the right vessel or aircraft for each project and type of cargo. We provide dedicated commercial, technical and legal support to ensure your needs are met and your goods are shipped safely.

Full visibility of your supply chains

Our dynamic IT solution One Global System (OGS) provides your company with full transparency and end-to-end visibility on line item level throughout the entire supply chain. Using OGS, you can effectively manage your logistics operations and vendors while mitigating and managing costs and risks via electronic data exchange.

The software supports Electronic Data Interchange (EDI), both inbound and outbound, at each stage of the process, ensuring supply chain visibility and accurate data. An Application Programming Interface (API) allows for easy integration with external systems. OGS is a responsive application which means it can be accessed from any device and provides you up-to-date insights from anywhere in the world.

Industry focus:

- Engineering, procurement & construction (EPC)
- Industrial original equipment manufacturers (OEM)
- Renewable energy
- Power generation
- Mining and metal
- Infrastructure
- Yard and conversion

Reducing CO2 emissions in project logistics

Today, the logistics industry contributes to about 8% of global CO2 emissions. Project logistics often requires a combination of different transport solutions, which can further increase the carbon footprint of a project. With the launch of its zero carbon goals, Kuehne+Nagel has committed to reducing CO2 contribution and offering customised, environmentally friendly and sustainable supply chain solutions to our customers. Leveraging our digital platforms, Kuehne+Nagel can work with you to optimise your choice of transport routes and means, to build sustainable supply chains.

Health, Safety and Environment policy

At Kuehne+Nagel, we provide the highest standards of Health, Safety and Environment (HSE) management at all times. We minimise accidents or workplace-related illnesses by implementing HSE management and quality assurance at all levels and through mandatory training. This applies not only to our employees, but also to everyone working on our premises, our business partners, customers, and the environments in which we operate. Using our web-based HSE tool enables immediate actions and clear insight into operations from an HSE perspective. Our standards are compliant with the common global certifications: ISO 9001 (Quality), ISO 14001 (Environment) and ISO 45001 (Safety & Health). All our employees and customers have access to our HSE tool and can report incidents, unsafe conditions, as well as positive observations.

Take advantage of our services:

- **Customs clearance**
Whenever you need customs expertise, we have the people, licences and permits to clear your shipments on schedule. Regardless of volume, scope or scale, our global network of specialists can meet commitments, no matter where your business is located.
- **Freight management**
We develop consolidation concepts, identify temporary storage solutions, provide value-added services (e.g. industrial packing), customs clearance, factory-to-site transport solutions, installation and rigging.
- **Chartering**
Our global chartering experts provide 24 hours services across all time zones, sourcing the most suitable mode of transport or equipment (type of trailer, vessel, aircraft, etc.) for any assignment and offering instant quotes.
- **Supercargoes**
Our supercargoes accompany loading and discharging operations, supervise lashing and welding, ensure safe lifting and rigging.
- **Engineering**
You can rely on round-the-clock engineering support. Our dedicated team of engineers conduct feasibility studies and route surveys, simulate swept path analysis, create CAD based technical drawings, lifting calculations, and issue cargo handling method statements.
- **HSE compliance**
We assess risks, ensure job safety and provide training to our subcontractors. All our colleagues have access to our HSE App to report unsafe acts/conditions, incidents and even positive observation.
- **Cargo insurance**
In partnership with NACORA Insurance Brokers we offer leading cargo insurance solutions tailored to the individual needs of our customer's operations.
- **Trade compliance**
We offer a comprehensive range of customs and trade compliance services to help you meet this critical and integral aspect of your international trade.

Project Logistics

Your benefits:

- Highest standards in Health, Safety and Environment (HSE)
- Global coverage in strategic core locations
- 24/7 emergency service worldwide
- Full transparency and control via in-house IT software OGS
- Oversized and heavy-lift shipments
- A global network of project experts
- Cargo damage risk prevention
- Vendor management
